## Award Winning

We are a multi award winning business with a proven track record over 25 years! Our awards are the extra assurance to you that our hard working teams excel at what they do. We acknowledge the support, experience and knowledge we receive along the way from our trusted partners.

“

**Our partnership with O'Brien Electrical Granville is a highly valued one.** With an extensive 25-years plus background in electrical services across residential, commercial, and industrial projects, O'Brien Electrical have the know-how and customer service edge that is required to traverse straightforward to highly complex electrical services. Harp Renewables Australia's specialist onsite proprietary bio digester technologies require the technical expertise of O'Brien Electrical to ensure the smooth installation of units into the workplace and to support our maintenance program. O'Brien Electrical consistently deliver exceptional customer service to all our valued Harp customers and we could not recommend their services more highly.

# Certification and Accreditation

---

## We take the risk out of your decisions!

We pride ourselves on having a team of **highly skilled and experienced electricians** who are **certified and licensed** to work in a variety of key electrical specialties.

# Giving Back

---

It's important to our company that we **give back and support** those that help others lead a better life. As part of the wider O'Brien Group's recent support and fundraising efforts for Beyond Blue, we have gained a better awareness of mental health struggles, especially amongst young men and we strive to provide and foster a supportive culture amongst our team.

**Our team regularly participates in the annual Taskforce as part of O'Brien Advantage Conference.** This incredible initiative emphasises the **power of the network working** together to achieve the same goal to refurbish a local charity with a focus on sustainability.

**Giving back within the industry** is just as important to us. The last 5 years has seen our increased involvement with leading industry association, Master Electricians Australia, engaging on the Board of Directors and with their Women in Contracting program.

# Looking to the Future

---

## Diversity

Our **diverse workforce is the key to our innovation, creativity, and problem-solving ability**. We embrace people from all backgrounds and perspectives and have been a strong supporter of both local and overseas sponsored employment. This gives us the unique ability to embrace **experience and knowledge from across the globe**. As part of the O'Brien Group we are developing long term initiatives and strategies for **attracting and retaining women into the trade sector**. We continue to recruit and train apprentices year on year to ensure the **stability of our workforce** and the continued growth of our industry.

## Environment & Sustainability

Responsible environmental practices including sustainability, recycling and renewable energy are part of what we do every day.

- **Food waste** - leading the way with an onsite bio-digester, the innovation and clever design by Harp Renewables enables us to reduce the amount of food waste going to landfill each day.
- **Industrial waste disposal** - responsible recycling of obsolete and end of life products including fluorescent globes, metals, IT equipment and mobile phones, paper and cardboard.
- **Powered by solar** - our premises are powered by solar, using the latest technology from Schneider and Tesla.
- **Lighting upgrades** to our own premises have helped reduce the demand for electricity.

# Supply Partners & Systems

---

We work only with the best suppliers and systems across the industry to ensure our operation remains streamlined and wholly focused on providing **the highest quality level of service and workmanship to each and every client.**

We ensure safety and efficiency in everything we do, and we only source our materials from preferred suppliers that meet Australian Standards.
